SUPPLIER SUSTAINABILITY LETTER

Valued Supplier,

Healthcare DME holds itself to high standards and these, along with our management philosophy, are embodied throughout our business. Our Responsibility Standards for Suppliers reflect our internal values and the expectations of external stakeholders, such as customers, regulators, investors and the public. Furthermore, we find business relationships are more productive and effective when they are built on trust, mutual respect and common values.

Healthcare DME is committed to collaborate with our suppliers to accelerate environmental and social improvements across the value chain. Achieving better sustainability is integral to our long-term success and encourages greater integration and increased transparency across our supply base to collectively drive impact.

Our goal is to work with suppliers covering 80% of our spending that meet or exceed or sustainability goals by 2025. We put great trust in our suppliers and ask for maximum transparency.

Whether you are a supplier early in our sustainability journey or an industry leader we ask all suppliers to help us reach a more sustainable business environment. As a local company we are very conscious of our community and its care. We strive for healthier practices that contribute to the improved health of people and our community. If each supplier takes this message to its suppliers, think of the impact we can have together.

Businesses like ours must help to create a healthier society, and by working together we can achieve this goal together.

Thank you in advance and we look forward to our continued partnership.

Ashfaq Kādwanī
Executive Director
Healthcare DME
